

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

This twenty-fourth annual cumulation continues the series of annual volumes interrupted last year by the publication of the three and a half year Supplement to the United States Catalog, which included the material normally constituting the 1921 annual cumulation. Therefore, altho no volume labelled twenty-third cumulation has appeared, there has been no break in the record of books published and it has seemed best to call this the twenty-fourth annual cumulation as it really is, and as the volume number of the *I n d e x* indicates.

The time-honored title-page of the *I n d e x* does not fully disclose its scope. Besides a full record of books published in the United States, many thousands of pamphlets and documents are also listed. Monographs issued as university or society publications, state and city documents other than annual reports, as well as a liberal selection of federal documents are included. Annual reports, federal, state or city, are entered but once, with the Library of Congress card number if possible.. Any attempt to complete the record for them would burden the *I n d e x* too greatly and the Catalog of United States Public Documents and the Monthly List of State Publications probably suffice for those who desire to know whether or not a report for a given year was published. It is hoped that the subject entries here given for documents are proving of value.

Special acknowledgement is due three long time members of the *I n d e x* staff for their loyal work on this cumulation. Miss Dorothy Carpenter, Miss Leila Hildreth and Mrs Frances Nolan Murray have given intelligent, experienced help without which the exacting requirements of a publication of this sort could not be fulfilled.

July 27, 1922.

Names Used as Headings.

Entries are made preferably under the author's real name, but under the pseudonym, when the real name is not known or rarely used; under names of editors of compilations; under names of countries, states or cities which are treated as authors of their publications and of law reports; under names of societies or conventions, as authors of their transactions, journals, reports, and collections; under names of churches as authors of liturgies, hymn-books, catechisms, etc. (local churches, under name of place); under Bible when the book is a text or a paraphrase of any part of the Bible. Entries are made under the first word of the title, not an article, of anonymous works, compilations published under collective titles, periodicals, and year-books. Translations, abridgments, and indexes, are put under the original work.

Parts of Names Used as Headings.

English compound names are put under the first part. English surnames beginning with a prefix are put under the prefix; in French names, under the prefix excepting the preposition de and d'; in all other languages and in French names beginning with de or d', under the name following the prefix. British noblemen are put under their titles; bishops under their family names; members of royal families, canonized persons, and members of religious orders under their first names.

Author Entries.

Author entries include fuller title than under subject, also series, paging and Library of Congress card number.

Library of Congress Cards.

Numbers to be used in ordering the printed catalog cards of the Library of Congress are given at the end of the main (author) entry of each book. In many government publications, however, for which only subject entries are given, these numbers are attached to the subject entries. When there has been no card for a particular title but a general card for the series to which the title belongs, the series number is used and enclosed in curves. Where the card number is enclosed in [] it indicates that the card at Library of Congress is for a different edition of the book by a different publisher.

When a book is entered before the Library of Congress card number can be procured, it is reentered in a succeeding issue of the Index with the order number attached. It will be necessary for example, to look in the current issues of the Index for the numbers of some books that were published in the preceding year and cataloged in the Index for that year.

In ordering cards by these numbers, the numbers should be arranged in columns in increasing order of the numbers. The number of copies wanted should be indicated after the card numbers with a slanting line between, e. g., 5-2850/4. The price of cards ordered by numbers is 2½c. for the first copy and 1 3/10c. for each additional copy. If the order is by author and title, the price of the first card is 4c. For further information apply to the Card Section of the Library of Congress, Washington, D.C.
